

SYDNEY CIVIL

IMPROVING TRAFFIC AND SAFETY IN WOLLI CREEK - CONSTRUCTION UPDATE (FEBRUARY 2020)

Bayside Council is working to improve traffic flow and safety for road users, pedestrians and cyclists in Wolli Creek.

In January, Sydney Civil was engaged to implement the one way circuit chosen by the community, plus other improvements. These will include increased street lighting, widening and beautification of footpaths and roads, extra pedestrian crossings, adding a bicycle lane and addressing storm water issues to fix localised flooding.

Our work started in early February. Some minor delays were experienced due to the severe weather earlier this month, and a complex intersection of electrical, water and gas services with the new drainage system. Solutions have been identified to be implemented. As an update:

Completed for the month:

- Works on Willis Street, including the first half of a deep excavation for road reconstruction, and the beginning of a channel stormwater system
- Works on Arncliffe Street including trenching for the storm water upgrade

Programmed for March:

- Continuing work on the Willis Street stormwater upgrade, and the second half of the deep excavation for the road reconstruction
- Continuing work on the storm water upgrade on Arncliffe Street.

Please note the new one way system is now in operation and it is a permanent traffic arrangement. Please follow all

signs and directions given by traffic controllers.
