

SYDNEY CIVIL

IMPROVING TRAFFIC AND SAFETY IN WOLLI CREEK - CONSTRUCTION **UPDATE (MARCH 2020)**

Bayside Council is working to improve traffic flow and safety for road users, pedestrians and cyclists in Wolli Creek.

In January, Sydney Civil was engaged to implement the one way circuit chosen by the community, plus other improvements. These will include increased street lighting, widening and beautification of footpaths and roads, extra pedestrian crossings, adding a bicycle lane and addressing storm water issues to fix localised flooding.

Update of work status:

Progress works for March:

- We have completed the channel stormwater system, kerb and gutter, and driveway reconstruction on the west side of Willis Street
- We have constructed half the road on Willis Street.
- The grated drain channel construction is progressing normally on the South side of Arncliffe Street.

Program of works for April:

- We are continuing work on the second half of Willis Street (East side), for the road and footpath reconstruction.
- We are also continuing work on the storm water upgrade, kerb and gutter and footpath reconstruction on Arncliffe Street (South side).

Please note the new one way system is now in operation and it is a permanent traffic arrangement. Please follow all signs and directions given by traffic controllers.
